ABOUT TECNOGREEN

Tecnogreen is a trademark of PT. Halim Makmur Jayaabadi, a company that specializes in manufacturing agricultural equipment. We understand that to improve the quality of agricultural products, effective supporting equipment is essential. Therefore, we offer equipment that can help achieve the best production results.

Tecnogreen focuses on environmentally friendly monitoring and control of plant pests and diseases. We understand that plant pest and disease control that is not environmentally friendly can affect the quality of agricultural products and the environment. Therefore, we ensure that our equipment can effectively and wisely help overcome these problems.

OUR COMMITMENT

Tecnogreen is committed to providing innovative and eco-friendly solutions to mitigate the impact of climate change on agriculture. By offering a range of products and services that promote sustainable farming practices, Tecnogreen aims to help farmers increase their productivity while minimizing their carbon footprint. The company believes that through the integration of technology and sustainable farming methods, it is possible to create a more efficient and environmentally-friendly agricultural industry that benefits both farmers and the wider community.

VISION & MISSON

Proactive and adaptive as well as supporting the advance-ment of appropriate technology in the implementation of activities and business activities in sustainable human life by implementing environmentally friendly product innovations.
